DETAILED ACTION

1. The office action is in response to the application filed on 10/23/2003
2. Claims 1-35 are pending in this application.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 are drawn to "Generating database or data structure", classified in class 707, subclass 102.
 - II. Claims 10-20 are drawn to "Query processing", classified in class 707, subclass 3.
 - III. Claims 21-35 are drawn to "Database schema or data structure", classified in class 707, subclass 100.
2. The inventions are distinct, each from the other because of the following reasons:
Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. See MPEP § 806.05(d).

Art Unit: 2173

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
